

BRIDGING THE GAP

between ocean and coastal observational data and societal needs to deliver actionable information

Who we are

The GEO Blue Planet Initiative is the coastal and ocean arm of the Group on Earth Observations (GEO) that aims to ensure the sustained development and use of ocean and coastal observational data for policy and decision-making. We do this by working with stakeholders to understand their information needs and connecting them with available data and products.

GEO Blue Planet is an open community and all who share the interests of the GEO Blue Planet community are welcome to join.

The GEO Blue Planet Secretariat is currently supported by the United States, the European Union and Korea.

KOREA MARITIME INSTITUTE

What we do

GEO Blue Planet works with stakeholders to identify their ocean and coastal information needs, co-design responsive tools and products, and build capacity to strengthen and transfer capabilities.

Activities are selected based on stakeholder needs and currently focus on ocean and coastal observations for the following topics:

Marine litter

Eutrophication

Coastline changes

Fisheries

Sargassum

Oil spill

Climate adaptation

All activities support and contribute to the UN Decade of Ocean Science for Sustainable Development

Join us

If you are interested in being a part of GEO Blue Planet, please contact the Secretariat via info@geoblueplanet.org.

The next GEO Blue Planet Symposium will be held in Jeju, Korea, end of October 2023!
